"Not even that. He leaned over and whispered: 'I paid the pastor's fare in the car yesterday morning. We'll call it aquare.' —Philadelphia Press.

Geographical Changes.

"I don't see any use in having ware in this advanced age." remarked Mrs. Suburba, turning up the lamp.
"If you were a mapmaker," replied Mr. Suburba, glancing up from the new atlast on his knees, "you probably would."—Cincinnati Times-Star.

For Growing Girls,

West Pembroke, Me., March 21.—Mrs. A. L. Smith, of this place, says that Dodd's Kidney Pills are the best remedy for growing girls. Mrs. Smith emphasizes her recommendation by the following ex-

for growing girls. Mrs. Smith emphasizes her recommendation by the following experience:

"My daughter was thirteen years old last November and it is now two years since she was first taken with Crazy Spells that would last a week and would then pass off. In a month she would have the spells again. At these times she would eat very little and was very yellow, even the whites of her eyes would be yellow.

"The doctors gave us no encouragement, they all said they could not help her. After taking one box of Dodd's Kidney Pills, she has not had one bad spell. Of course, we continued the treatment until she had used in all about a dozen boxes, and we still give them to her occasionally, when she is not feeling well Dodd's Kidney Pills are certainly the best medicine for growing girls."

Mothers should heed the advice of Mrs Smith, for by so doing they may save their daughters much pain and sickness and ensure a healthy happy future for them.

First Little Girl—"My father is an edi-tor; what does yours do?" Second Little Girl—"Whatever mamma tells him."— Glasgow Evening Times.

Teosinte and Billion Dollar Grass. The two greatest fodder plants on earth, one good for 14 tons hay and the other 80 tons green fodder per acre. Grows everywhere, so does Victoria Rape, yielding 60,000 lbs. sheep and swine food per acre. [K. L.]

EIGHT YEARS OF TORTURE.

No suffering more keen than kidney suffering. Sick kidneys make bad blood; causs weak, stiff and aching backs; cause blind sick and dizzy headaches, lack of appetite and loss of sleep; keep you all tired out and spoil digestion.

To have perfect health, you must cur€ the kidneys. Read how one man was cured by Doan's Kidney Pills after eight years of torture.

Henry Soule, of Pultney St., Hammondsport, N. Y., says: "For eight years I suffered constant agony from kidney complaint. I endured the worst torture from gravel and the kidney secretions were excessive and con tained sediment like brick dust. I had to get out of bed from ten to twenty times a night and the loss of sleen wore me out. Indigestion came on and the distress after eating was terrible Doan's Kidney Pills effected a complete and lasting cure, and after the symptoms of kidney trouble were gone my stomach began to work as it should. This lasting cure, especially in a person of my age, proves the great value of Doan's Kidney Pills more convincingly than could any words of

COLLEGE CIRLS IN EUROPE. PAY OF THE SHIP'S DOCTOR

There Is a Great Difference Between Their Surroundings and Those of Students in This Country.

In some respects college girls in all parts of the world are similar in disposition, ambitions and desires, but those of Europe have many characteristics wholly dissimilar to those possessed by the American girl of erudition. The American woman's college is a thing wholly amazing in European eyes, says an educational journal. No European educational institution would think of allowing its inmates such a luxuriousness of surroundings as appears in the American girl's college room, the excational community.

class symbols, with men's pictures on his ship.

desks and dressing table, might be a "To any passengers who are sufferocean young women are supposed to and its concomitant evils or who remeet on equal terms of comradeship ceived injuries which are in any way due the subjects of the aforesaid pictures. to the ship, the doctor's services are The absence of books in the room and free. For any sickness contracted bethe conspicuous presence of candy boxes | fore sailing or during a voyage which is and fruit baskets might also strike the not connected with the above-named European observer as peculiar.

All this corresponds with a radical difference in the life of women students in America and Europe. The European girl goes to her university purely for passengers should be rendered gratis or learning, and in the lower educational it would be for any visitor in a hotel or Institutions it is the same. Study is traveler on a railway to expect to have the business of life, and only those fortunate ones who have friends and rela- for which the hotel or railway authortives to take them out occasionally and lities could not be held responsible. give them a good time ever get any fun.

thing that her American sister learns out of her life more experience and at sea life a permanency. least the same amount of pleasure as the American girl does, although in a from \$30 to \$50 a month. This, for duway entirely different; this is the girl ties to officers and crew. As regards paswho attends a university for men and sengers in relation to the surgeon, the enjoys in the old world, among hundreds | following groups will include all: First, of men, the perfect freedom of movement and iceling of independence which by remunerating the surgeon, perhaps characterizes the happy nie of the handsomely, for any services rendered: American college girl (happy in that, second, the passenger who asks for his she realizes by herself an ideal of free bill and pays it, if reasonable; third, the and intelligent life without the inevita- passenger who, traveling for the first ble strain which comes to the same life time, does not know whether to ask for

critic proceeds, by the historical words surgeun is there solely for the benefit piness." many elements are cooperating, among which, notably, are papa's checks and the advantages depending thereon; faculty votes prohibiting a schedule of over so many hours a week or more than a certain number of courses for the semester; constant anxiety on the part of "Prex" and "M. D." lest the young buds of hope break down under the strain of study, and so forth.

This last appears particularly strange to the European mind. No one gives a thought there, it appears, to the effects of study on the health of the students, "We may moan, sigh or revolt," says the writer; "we may strike, protest or die in the attempt; from the serene Olympus of the faculty the gods watch with calm, unruffled brow the struggle of the nonentities down in the halls of learning."

Strange Tribes in Africa. Maj. Powell-Cotton's expedition in eastern equatorial Africa, just completed, has resulted in the discovery of six tribes of men previously unknown to the civilized world. One of these tribes is known to its neighbors by the name Rudolph and Lake Albert, and their villages consist of two-story houses built of wattle, and mouped together on the upper slopes of the hills. They inspire great awe among the dwellers in the valleys below, although the latter outnumber them a thousand to one. Their formidable reputation appears to be based upon their superior intelligence. None of the new tribes discovered by Maj. Powell-Cotton had ever met a leaves, were used. An excited crowd white man, and they treated their vis- watched the competition and enthus-

System in Vogue on Ocean Passenger Steamers from Which There Is Seldom a Departure.

A correspondent of a recent edition of Lloyd's Weekly has expressed the views of a ship doctor in the following words: "Many travelers are in doubt as to the position of the ship's doctor in regard to his remuneration from passengers for services rendered. The merchant shipping act enacts that every foreign-going vessel having 100 persons on board or upward shall carry on board as part of her complement a duly qualified medical practitioner. Furthermore, an emigrant ship-i. e., a fortreme simplicity of the food being the eign-going vessel which carries 50 or only thing common to both types of edu- more steerage passengers-must have a medical man irrespective of the num-To the uninitiated beholder the ber of crew or of other passengers car-American college girl's room, with flags ried. Formation of a Lake.

A remarkable phenomenon is reported from the Russian rural commune of Schava, in the government of Ezareff Koksaka. Inexplicable sounds were heard for several days issuing from the earth. The sounds varied from something like the booming of cannon to the screeching of steam whistles, and seemed to come from a forest skirting the commune. In this forest, where the terrifled peasantry gathered in expectation of some calamity, the earth was seen to heave incessantly. Gradually huge cracks appeared and water was seen. At last the earth seemed gradually to sink, water rose and there appeared a new lake of considerable extent, which is now being examined by geologists.

Curious Effect of Motor Cars. In Surrey, England, the county surveyor has observed that the large rubber tires of motorcars in passing at a high speed over dry gravel roads suck up the finer particles from the roadbed, and leave the surface covered with a sharp grit. Another report from the same county avers that the effect of heavy, swift-moving motorcars is to "tear gravel roads all to pieces." A smooth, hard surface is required to resist the action of the rubber tires.

Snail-Eating Contest.

A snail-eating contest took place recently in a Paris restaurant for 50 louis between two boulevardiers. Special Burgundian snails, fed on vine itors in a friendly manner.-Youth's jastically applauded the victor, who swallowed 243 snails.

HINTS ON FRUIT GROWING.

The Science of Cleft Grafting Described So That Any Bright Man Can Practice It.

"Stock" is the term used to indicate the plant grafted upon, whether large or small.

"Scion" is the term used to express the part inserted, of whatever size or form it may consist. These should be of the new, well-ripened growth of the season. If scions are to be used in the spring, they should always be cut late in the fall. Spring-cut scions may often be used successfully, but it is not safe to trust to them, especially if when cut open the heart-wood appears dark-col-ored. They should be stored in moist sawdust or sand in a cold cellar, or buried in the ground outdoors, during winter.

The principles which underlie grafting are the same as in budding-that is, the scion and stock must be closely related; the work must be done in such manner that the inside bark of both scion and stock come closely in contact, and at a season of the year and under such circumstances that they may unite at once or as soon as growth starts. The success of the operation largely depends (1) on having the stocks and scions perfectly healthy; (2) in selecting the proper season, which varies somewhat with different plants; (3) in getting a perfect union of the inner barks of scion and stock at least on one side; (4) in making all the cuts " a sharp knife, that the parts in

contact may have a smooth surface: (5) in doing the work rapidly, so that the surface may not be dried by ex-

Grafting-wax is generally used for overing the wounds made in grafting. good grafting-wax is one that will not become too soft in summer, so as to melt and run down the stock, or so hard in winter as to crack and split off. A very reliable grafting-wax is made by melting together four parts (by weight) of resin, two parts of beeswax and one part of tallow. When well melted, pour into a pail of cold water, grease the hands slightly, and pull the wax until it is about the color of pulled molasses-candy. Make into balls, and store for use. This wax should be warmed when applied. If it is too hard, more tallow and less resin may be used.

Clay is frequently used for covering wounds made by grafting, and gives quite as good results as any of the waxes if properly applied. For this purpose some very tenacious clay should be used, and it is thought to be improved when mixed with about onethird fresh cow-dung and a little plasterer's hair. The whole mass should be thoroughly worked over before us-

Cleft-grafting is a very common form of grafting, and is more universally known and used than any other. It is commonly performed to change the bearing of apple, plum and various other trees and plants. It is generally the most practical method to use on branches two or three inches in diameter, but it also works well on quite small stocks.

Cleft-grafting is performed as follows: The place selected for the insertion of the scion should be where the grain of the wood is straight. The stock is then cut 'square' off with a sharp saw, and is split through its center with a grafting-chisel to a depth sufficient to allow the scion to be put in place. The cleft is held open by the chisel until the scion is cut and inserted, when the wedge is withdrawn, allowing the stock to close on the scion and so hold it in place. If the stock does not spring back so as to hold the scion firmly, it should be tightly drawn together with a string. The number of scions inserted will depend upon the stock. If the stock is not over threefourths of an inch in diameter, one scion is enough to insert, but on larger stocks two may be put in. All the cut surfaces, including the ends of the scions, should now be covered with wax. The scion to be inserted in cleftgrafting should be cut wedge-shaped lengthwise.-Farm and Fireside.

Purpose of Pruning Grapes.

The purpose of pruning is to leave only a sufficient number of buds on canes of the current season's growth to give such an amount of fruit the coming season as the age and strength of the vine can support. Pruning should be varied somewhat to suit the habits of the different varieties. The stronger growing sorts should have more wood allowed them than the weaker ones. The vines should not he allowed to bear much fruit until strong enough to grow vigorous canes with strong laterals. Thrifty laterals develop fruit buds near the These laterals are cut back to from four to six buds, depending on the age and strength of the vine. Allow as much fruit to set as the vine can support and grow to perfection .-Farmer's Review.

Reparing Damage by Frost. Where peach trees are killed or injured by freezing, if they are not too large, they may be cut off at the live wood and will often send out a new top and be a profitable tree in one or two years. If there seems to be injury the body from bursting bark, so that a full supply of sap cannot be afforded the top, cut the top well out, After cutting off dead bark, cover the wounded trunk with grafting wax. If the trees are well cared for otherwise it will grow a new top.—Edward Van Alstyne, in Farm and Home.

WESTERN CANADA HAS AN EXCELLENT CLIMATE-

The Saskatchewan Valley Very Highly Favored.

An interesting feature of Western Canada is its climate. Those who have made a study of it speak highly of it. The Canadian Government Agents are sending out an Atlas, and at the same time giving valuable information concerning railway rates, etc., to those interested in the country. As has been said, the climate is excellent. The elevation of this part of Canada is about 1,800 feet above the sea, about twice that of the average for Minnesota. It is a very desirable altitude. The country has a very equable climate, taking the seasons through. The winters are bright and the summers are pleasantly warm. R. F. Stupart, director of the meteorological service for Canada, says:

"The salient features of the climate "of the Canadian northwest territories "are a clear, bracing atmosphere dur-"ing the greater part of the year, and "a medium rainfall and snowfall. The "mean temperature for July at Winni-"peg is 66, and Prince Albert 62. The "former temperature is higher than at "any part of England, and the latter "is very similar to that found in many "parts of the southern countries."

At Prince Albert the average daily maximum in July is 76 and the minimum 48. Owing to this high day temperature with much sunshine, the crops come to maturity quickly.

Moisture is ample in the Saskatchewan valley, being about 18 inches annually. It is notable that about 75 per cent, of the moisture falls during the crop months. Thus, Western Canada gets as much moisture when it is needed and with several hours more sunshine daily than land further south gets during the growing season, it is not difficult to understand why crops mature quickly and yield bountifully.

Winter ends quickly, sowing is done during April and sometimes in March. Harvest comes in August, about the middle. Cyclones, blizzards, dust and sand storms are unknown.

Husband—"Does Jack know Miss Pep-pertree?" Wife (calmly)—"I believe not, for he has asked her to marry him."— Town and Country.

The Editor of the Rural New Yorker, than whom there is no better Potato Expert in the country says: "Salzer's Earliest Potato is the earliest of 38 earliest sorts, tried by me, yielding 484 bu, per acre." MEXICAN Mustang Liniment for Man, Beast or Poultry.

MEXICAN Mustang Liniment cures Cuts, Burns, Bruises.

Miss Nettie Blackmore, Minneapolis, tells how any young woman may be permanently cured of monthly pains by taking Lydia E. Pinkham's Vegetable Compound.

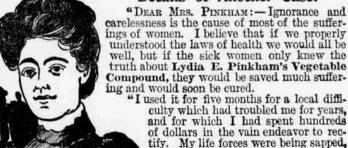

"Young Women:—I had frequent headaches of a severe nature, dark spots before my eyes, and at my menstrual periods I suffered untold agony. A member of the lodge advised me to try Lydia E. Pinkham's Vegetable Compound, but I only scorned good advice and felt that my case was hopeless, but she kept at me until I bought a bottle and started taking it. I soon had the best reason in the world to change my opinion of the medicine, as each day my health iraproved, and finally I was entirely without pain at my menstruation periods. I am most grateful."— NETTIE BLACKMORE, 28 Central Ave., Minneapolis, Minn.

Painful Periods

requickly and permanently overcome by Lydia E. Pinkham's Vegetable Compound. The above letter is only one of hundreds of thousands which prove this statement to be a fact. Menstruation is a severe strain on a woman's vitality,—if it is painful something is wrong. Don't take narcotics to deaden the pain, but remove the cause—perhaps it is caused by irregularity or womb displacements, or the development of a tumor. Whatever it is, Lydia E. Pinkham's Vegetable Compound is guaranteed to cure it.

If there is anything about your case about which you would like special advice, write freely to Mrs. Pinkham. She will treat your letter as strictly confidential. She can surely help you, for no person in America can speak from a wider experience in treating female ills. She has helped hundreds of thousands of women back to health. Her address is Lynn, Mass., and her advice is free. You are very foolish if you do not accept her kind invitation.

Details of Another Case.
